pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          NFH_RAT
                                                                                                                                  INTERFILAMENT CROSS BRIDGES THAT ARE IMPORTANT IN THE MAINTE OF AXONAL CALLBER.

OF AXONAL CALLBER.

OF AXONAL CALLBER.

OF AYONAL CALLBER.

THE PROST OF THE FUNCTION SEEMS TO PLAY A MAJOR ROLE IN THE FUNCTION THE LARGER NEUROFILAMENT POLYPEPTIDES (NF-M AND NF-H), THE LEVELS OF PHOSPHORYLATION BEING ALTERED DEVELOPMENTALLY AND COINCIDENT WITH A CHANGE IN THE NEUROFILAMENT FUNCTION.

SIMILARITY: BELONGS TO THE INTERMEDIATE FILAMENT FAMILY.

CAUTION: REF. 1 SEQUENCE DIFFERS FROM THAT SHOWN FROM POSITIC ONWARD AND IS LONGER DUE TO A FRAMESHIFT.
                                                                                                                                                                                                                                                                           FUNCTION: NEUROFILAMENTS USUALLY CONTAIN THREE IF PROTEINS: L, MAND H WHICH ARE INVOLVED IN THE MAINTENANCE OF NEURONAL CALIBER.

NF-H HAS AN IMPORTANT FUNCTION IN MATURE AXONS THAT IS NOT SUBSERVED BY THE TWO SMALLER NF PROTEINS.

PTM: THERE ARE A NUMBER OF REPEARS OF THE TRIPEPTIDE K-S-P, NFH PHOSEHORYLATED ON A NUMBER OF THE SERINES IN THIS MOTIF. IT IS THOUGHT THAT PHOSPHORYLATION OF NFH RESULTS IN THE FORMATION OF INTERFILAMENT CROSS BRIDGES THAT ARE IMPORTANT IN THE MAINTENANCE.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   large neurofilament subunit (NF-H)
                                                                                                                                                                                                                                                                                                                                                                                                                      Natl. PTM: THE TANDEM 7 RESIDUES REPEATS CAN BE HIGHLY PHOSPHORYLATED.
THE PHOSPHORYLATION ACTIVATES POLZ.
MISCELLANEOUS: THREE DISTINCT ZINC-CONTAINING RNA POLYMERASES AF
FOUND IN EUKARYOTIC NUCLEI: POLYMERASE I FOR THE RIBOSOMAL RNA
PRECURSOR, POLYMERASE II FOR THE MRNA PRECURSOR, AND POLYMERASE
III FOR 5S AND TRNA GENES.
SIMILARITY: BELONGS TO THE RNA POLYMERASE BETA' CHAIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          x63564; CAA45125.1;
